CONTINUING PROFESSIONAL DEVELOPMENT

Continuing Professional Development (CPD) is the learning activities professionals engage in to develop and enhance their abilities. CPD enables learning to become conscious and proactive, rather than passive and reactive. CPD is the holistic commitment of professionals towards the enhancement of personal skills and proficiency throughout their careers.

Quantum AI Badi CPD courses combines different methodologies to learning, such as training workshops, conferences and events, e-learning programs, best practice techniques and ideas sharing, all focused for an individual to improve and have effective professional development. A structured, practical, and methodical approach to learning helps employers across industries to retain key staff and develop the skills & knowledge in their organisations to maintain a sustainable and competitive advantage.

Engaging in Continuing Professional Development ensures that both academic and practical qualifications do not become out-dated or obsolete, allowing individuals to continually 'up skill' or 're-skill' regardless of occupation, age or educational level.

Quantum AI Badi is an associate of the CPD Certification Service. The CPD Certification Service was established in 1996 in the United Kingdom as the leading independent CPD accreditation institution operating across industry sectors to complement the Continuing Professional Development policies of professional institutes and academic bodies. The CPD Certification Service provides support, advice and recognised independent CPD accreditation compatible with global CPD principles.
